Petition to End the Sale of Pregnant Mares' Urine used for Hormone Replacement Therapy

To the Honourable Speaker and Members of the Legislative Assembly of the Parliament of Western Australia in Parliament assembled.

We the undersigned believe that the collection of the Estrogen supplement known as Pregnant Mare's Urine or PMU, in all of its forms, is a cruel and unnecessary practice. Not only is it inhumane, but has proven to be detrimental to women's health.

We believe it should be removed from the products list for Hormone Replacement Therapy.

There are plenty of plant based alternatives on the market which work as well (if not better) than Pregnant Mares' Urine, which cost less to produce and are therefore cheaper to the public.

Now we ask the Legislative Assembly to remove Premarin, Prempro, Premphase, Prempac and Premelle from the market and encourage Wyeth Pharmaceuticals to research more humane and sustainable products.
